---

## INTRO

---

I'm a full stack web developer, I have built multiple WordPress themes for small businesses and hobbyists (some of which are showcased on my portfolio). I can take any design and transform it into a fully functional web site with SCSS, PHP and WordPress. I often use bootstrap or other CSS frameworks, to increase my development efficiency.

I am currently learning React.js to progress and challenge my skills.

---

## SKILLS

---

PHP / JavaScript / SCSS / WordPress / React / ASP.NET

---

## EXPERIENCE

---

UnityPartnership – Oldham Council (Work Experience)

Junior ASP.NET Developer | October 2018 – Current

- I worked with lead developers on larger team projects and individually on smaller projects. I used Microsoft's 'Team Foundation Server' for version control in all of my projects.
- I was involved with team meetings, daily stand-up, talking to clients and managing client expectations when working on projects in the different areas of the company.

---

## PROJECTS

---

- **A&P Furnishing Ltd.** I created and maintain simple custom WordPress theme for a local furnishing company to display their goods online. -> <http://www.apfurnishing.co.uk>
- **WatchItShopper.** With the use of traversyMVC (a light weight PHP Framework) I created a platform to allow users to advertise used products they want to sell. This was a project I made during college to get extra credits. -> <https://www.watchitshopper.co.uk>
- More projects can be found on my GitHub page and my Portfolio website.

---

## AWARDS

---

- **Bronze and Silver Duke of Edinburgh.** I have achieved the Duke of Edinburgh Award up to grade Silver where I displayed leadership and physically challenged myself and others. As part of my volunteering section I coached a school basketball team, which challenged my leadership skills and expanded my own knowledge about the game. I have previously played Basketball at a national league level.
